

MEMORANDUM

TO:	North Yarmouth Planning Board Through Ryan Keith, Code Enforcement Officer
CC:	Chris Byers, Principal, Branch Renewable Energy
From	: Sam Peikes, Associate Planner, North Star Planning $\AA \!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!$
RE:	North Yarmouth Solar – Site Plan Review meeting April 12, 2022
Date:	March 28, 2022

Overview

Water Line Solar, LLC, the applicant, a subsidiary of Branch Renewable Energy, LLC, is proposing to develop an approximately 2 MW ground mounted solar array located at 238 Sweetser Road at Map 5 Lot 2. The project is within the Farm and Forest District and the Groundwater Overlay District. Approximately 14 acres of the project area will be developed for installation of solar equipment.

This project was last brought to the Planning Board on February 8, 2022 for a preapplication meeting. At that meeting questions were brought up regarding the extent of wetland impacts, stormwater permitting requirements, NRPA requirements, and noise levels of the panels. In addition to the required submissions, the applicant has also included a decommissioning plan and operations and maintenance plan. The decommissioning plan includes site remediation measures and financial surety and costs of equipment removal. The operations and maintenance plan provides a list of equipment to be used for the project and a description of safety measures.

Applicant: Water Line Solar, LLC (c/o Branch Renewable Energy, LLC)

Owner: Yarmouth Water District

Location: 238 Sweetser Road

Zoning: Farm and Forest and Groundwater Protection Overlay

Tax Map Number: Map 5 Lot 2

Existing Land Use: rural/forested

Proposed Land Use: community solar array

Acreage: approximately 14 acres

Waivers: The applicant is requesting a waiver from Section 10.3C and D for High Value Wetland buffer requirements.

<u>Waiver Recommendation</u>: Based on the supporting evidence from the applicant this is a reasonable waiver request.

Site Walk: A site walk for this project has not been scheduled.

Public Hearing: A public hearing for this project has not been scheduled.

Completeness: NSP reviewed the project and found the application complete.

<u>Suggested Motion:</u> To find the North Yarmouth Solar site plan application complete based on the submission requirements.

Findings of Fact and Conclusions of Law for the North Yarmouth Planning Board

<u>Suggested Motion</u>: To [approve/approve with conditions/deny] the North Yarmouth Solar site plan located on Map 5 Lot 2 based on the Findings of Fact and Conclusions in the Planner memo dated March 18, 2022.

Site Plan Review - Findings of Fact:

- 1. Utilization of the Site
- The approximately 14-acre community solar array will be constructed on a rural and forested lot and will limit disturbance and tree clearing as much as possible. See "Limit of Disturbance" areas shown on Site Plan C-1.0 dated March 9, 2022.
- The site topography is relatively flat and is adequate to support the development.
- Nine wetlands were delineated within the project area, totaling approximately 10 acres. One of those wetlands (wetland W-MR-06) is classified as a High Value Wetland. Total direct wetland impacts are approximately 0.68 acres for clearing and filling. No grading or stumping is proposed within the wetlands.
- No vernal pools or significant wildlife were identified within the project area (see Attachment 10).

2. Utilities

- All utilities are anticipated to serve the solar project and will be installed underground.
- The project will connect to the CMP grid and is within the Yarmouth Water District. No water supply will be needed.
- The site is on an aquifer and is anticipated to have minimal groundwater impacts.
- 3. Brook, Pond, Vernal Pool and Wetland Buffers
- The applicant is requesting a waiver from Section 10.3C and D High Value Wetland buffer requirements due to the fact that there will be no stumping or grading within the wetlands and the clearing and shading will not significantly diminish the productive habitat and natural ecosystem functions (see Attachment 9).
- The project will maintain a vegetated meadow within the limit of disturbance area and is applying for a Tier II NRPA permit.
- 4. Impact on Community Facilities

- The solar array will not result in a negative impact on the environment or community facilities.
- 5. Hazardous Materials and Emissions
- No hazardous materials or emissions will result from the project.
- 6. Exterior Lighting
- No exterior lighting is proposed for the project.
- 7. Financial and Technical Capacity
- The applicant has provided a letter from Gorham Savings Bank providing proof of financial capacity.
- The applicant has adequate resources and experience to carry out the project (see Attachment 7).
- 8. Landscaping, Buffers and Screening
- The solar array will be constructed in a forested area and is not visible from any abutting property or public road and therefore no additional buffering will be necessary.
- Most of the existing vegetation on site will be retained and minimal grading is proposed.
- No new landscaping or buffers are being proposed.
- 9. Noise
- The applicant has submitted a noise levels analysis (see Attachment 15).
- Project noise levels will not have any adverse effect on neighboring properties and will not exceed Town noise standards.

10. Signs

• No signs will be included for the project.

11. Storage of Materials

• No outside storage areas will be included for the project.

12. Stormwater Control

- Drainage on site generally flows southeast towards the Royal River.
- The solar array development will have minimal impact on existing drainage patterns. See Attachment 3 Surface Water Drainage Map dated March 10, 2022 showing existing and proposed drainage patterns.
- The applicant has submitted a Tier II NRPA Permit by Rule March 14, 2022 for minor earthwork within the wetlands to install solar posts (see Attachment 16).
- The applicant has provided an erosion and sedimentation control plan in compliance with DEP Best Management Practices. See Attachment 16D. and erosion control details C-5.0 and 5.1 dated March 9, 2022.

13. Protection of Significant Wildlife Habitat

• No significant wildlife habitat or rare or threatened species are located within the project area. See letters from MDIFW in Exhibit 10 dated January 20, 2022.

14. Access Management and Vehicular Circulation

- The project will not produce vehicular traffic other than for construction and maintenance needs.
- The project will utilize the existing 16-foot-wide access road connecting from Sweetser Road to the solar panel project equipment. See Site Plan C-1.0 dated March 9, 2022.
- The applicant sent a letter to the Fire Chief March 28, 2022 who determined that the access road hammerhead turnaround is adequate for emergency vehicle access.
- The solar project is sited on a back lot and will be provided with a rightof-way at least 50 feet wide prior to final site plan approval.

15. Pedestrian Ways and Bicycle Access

- No pedestrian or bicycle ways are being proposed for this project.
- 16. Off-Street Parking and Loading
- No off-street parking or loading will be included for the project.

Conclusions of Law:

- 1. The development **will** reflect the natural capabilities of the site to support development.
- 2. Utilities serving developments in the Village Center District and Village Residential District **will** be installed underground.
- 3. The proposed development **will not** result in a negative impact to the environment or to the community facilities or services.
- 4. The development **will not** contribute emission of dust, ash, smoke or other particular matter.
- 5. The proposed development **will** have adequate exterior lighting to provide for its safe use during nighttime hours.
- 6. The landscape **will** be preserved in its natural state, insofar as practicable, by minimizing tree and soil removal, retaining existing vegetation where desirable, and keeping any grade changes in character with the general appearance of neighboring areas.
- 7. The development **will** control noise levels such that it **will not** create a nuisance for neighboring properties.
- 8.—The size, location, design, color, texture, lighting and materials of all exterior signs **will/will not** detract from the design of proposed buildings and structures. **(N/A)**
- 9: Exposed non-residential storage areas, exposed machinery, and areas used for storage will/will not have sufficient setbacks and screening.
 (N/A)
- 10. Adequate provisions **will** be made for the collection and disposal of all storm water that runs off proposed roads, parking areas, roofs and other surfaces.
- 11. Developments **will** be designed to protect and conserve important wildlife habitat to the greatest extent feasible.
- 12. The layout of the site **will** provide for the safe movement of passenger, service, and emergency vehicles throughout the site.
- 13. The site plan **will/will not** provide for a system of pedestrian ways within the development appropriate to the type and scale of development. (N/A)
- 14.-Parking areas **will/will not** be constructed to protect the natural environment and visual character of the community, improve

pedestrian safety and accessibility, and promote the quality of life in developed areas. (N/A)

Sketch Plan Submission Requirements	Included/Not Included	Notes
•		
A fully executed and signed copy of the application	yes	
Evidence of payment of the application	yes	
11 copies of written materials plus 11 sets of maps		
or drawings	yes	
General Information	Included/Not Included	Notes
	Water Line Solar, LLC 8 Quarry	
Record owner's name, address, and phone number	Ridge, North Yarmouth, ME	
and applicant's name, address and phone number The location of all required building setbacks and	04097 (207)-653-9864	
buffers	see C-1.0	
Names and addresses of all property owners within	366 C-1.0	
500 feet of any and all property boundaries	see attachment 4
